Project Aware: Fish Identification

THE PROJECT AWARE Fish Identification Course introduces you to the most common fish families and species found in temperate and tropical waters. You'll also learn basic fish identification and scientific survey techniques as well as how important personal involvement is in aquatic conservation.

During the course, you'll practice basic fish identification techniques then collect fish identification data for submission to the REEF Fish Survey Project (if appropriate).

The course includes all the background you'll need to identify fish in your area, including:

- Information on Project AWARE and aquatic protection worldwide.
- Characteristics of local fish families and species.
- Fish survey techniques and strategies.
- Fish identification dive planning, organization and procedures

For more information, or to enroll, call (630) 833-8383.
