Equipment Specialist

YOUR DIVE EQUIPMENT represents a substantial investment. It makes sense to learn how to get the best return on that investment. This is what the PADI Equipment Specialist Course is all about. You'll learn:

- Routine maintenance you can do before and after every dive that will prolong equipment life and reduce the need for professional service.
- What happens to regulators, BCs and tanks when you bring them in for annual service or inspection.
- Emergency in-field repairs you can perform that may help save a dive or a trip.
- The latest developments in equipment technology, including BCs, regulators, dive computers and more.

For more information, or to enroll, call (630) 833-8383.
