

Underseas

Scuba Center, Inc.

Underwater Videographer

THE ADVANCES in video technology that have taken place over the past few years can only be described as revolutionary. In less than a decade, video production has gone from the realm of the professional television studio to something anyone can do with a personal computer.

This course is about more than just shooting underwater video that will amaze your friends and family. *It's about how to take that footage and turn it into something you can post on the Internet or burn to DVDs.*

As part of this course, you will spend time in the classroom, pool and open water. You'll have the opportunity to shoot a variety of video cameras (which we'll provide) and, as a class project, produce a short video that we'll post on the Underseas Scuba Center website and give to participants as a DVD. It's a great way to get started on a hobby that will allow you to share your underwater experiences with anyone.

For more information, or to enroll, call (630) 833-8383.
